Sharon Sanatorium

SEVENTEENTH

ANNUAL REPORT *of the*

SHARON SANATORIUM

SHARON, MASSACHUSETTS

THE SHARON SANATORIUM FROM THE SOUTH-EAST.

SEVENTEENTH ANNUAL REPORT

OF THE

# Sharon Sanatorium

For Pulmonary Diseases

SHARON, MASS.

December, 1907

---

*Incorporated March, 1891*

---

BOSTON

GEO. H. ELLIS CO., PRINTERS, 272 CONGRESS STREET

1908

## OBJECT OF THE SHARON SANATORIUM.

---

TO supply a suitable institution for the treatment of *incipient* pulmonary disease only, arising in women who are unable, for pecuniary and other reasons, to seek distant health resorts. Only patients who are of limited means are received, and no far advanced cases are admitted.

Price of board, \$5.00 per week, exclusive of laundry. The services of the Medical Director and medicines are given free of charge.

Visiting hours { from April 1 to November 1, 3 to 5 P.M.;  
                          { from November 1 to April 1, 1 to 3 P.M.

Visitors are kindly requested to adhere to these hours.

Applications must be made to the Superintendent, Miss Alice R. Hodges, Sharon, Mass.

# OFFICERS OF THE SHARON SANATORIUM.

Mrs. ROBERT M. MORSE.

All gifts of money may be sent to the  
Treasurer.

Mr. N. H. STONE,

614 Sears Building, Boston.

THE SHARON SANATORIUM FROM THE SOUTH-WEST.

## DIRECTORS' REPORT.

---

The change of date of the annual meeting from March to December necessarily makes the Directors' report this year come three months earlier than usual, and hence an exact comparison with the work of preceding years is impossible.

The same favorable report can be given as heretofore, however, so far as the large number of applicants is concerned and the success attained in the treatment of patients. The following extracts from letters received recently from two who left the Sanatorium seven or more years ago are specimens of expressions now frequently received:—

“Every year I feel more and more indebted to you for the new lease of life which came to me while at the Sanatorium. For more than two years I have not lost a single day's teaching on account of illness, which goes to prove, I think, that hard work agrees with me. . . . So many pleasant memories come back to me whenever I think of the old days at Sharon. A deep sense of gratitude also fills my heart for all that was done for me by the dear friends connected with the Sanatorium.”

Another patient writes:—

“It is ten years ago this month since I went to the dear old ‘San.’ which proved such a haven of rest and comfort to me. I shall never cease to be grateful for all that was done for me there, and I hope some time to be able to show my appreciation in some substantial manner. My health is better than it has been

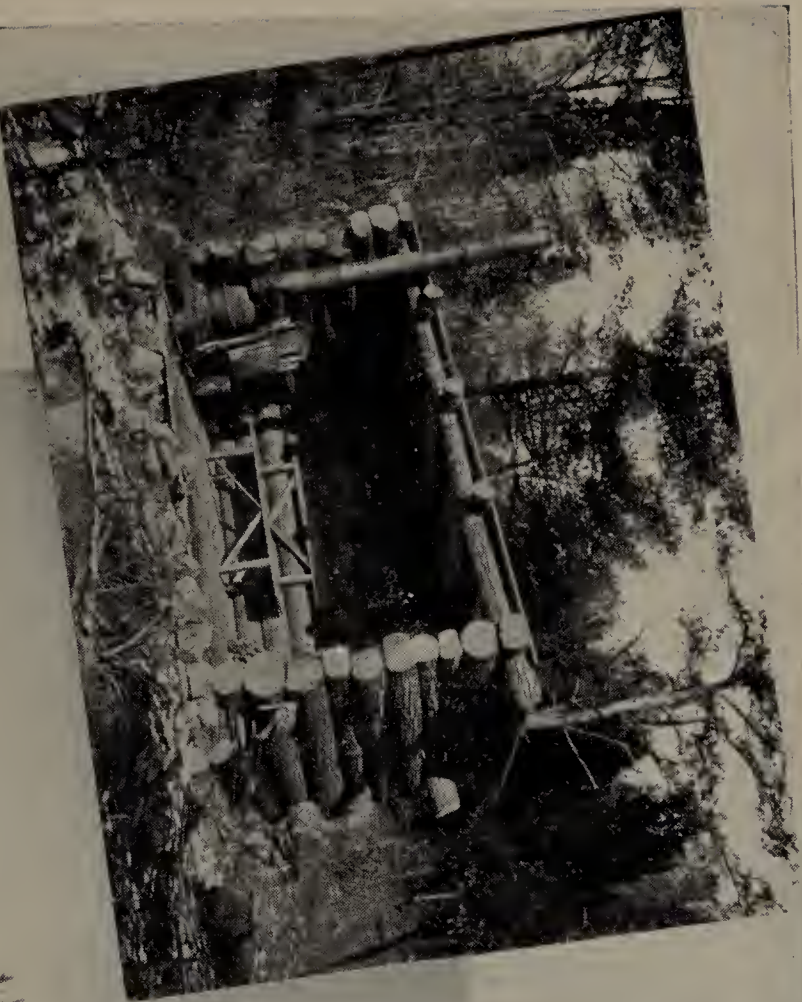

for years, for which I have the 'San.' to thank,—not only for benefits received during my sojourn there, but for knowledge gained with regard to more sanitary methods of living."

The steady increase in the cost of living up to the present has made greater demands than ever upon the treasury, and the question of raising the price of board to meet the larger deficit has been mooted. This has been thought unwise, however, lest it work to the disadvantage of those who cannot afford higher prices. This means a call for still more generous aid from the public than hitherto.

In consequence of a bequest a great improvement has been made in the ability to carry out the open-air treatment of patients by the construction of sleeping balconies. By comparatively slight changes of construction in the old part of the building and the new wing, all the beds can now be easily rolled out onto canvas-covered balconies, which are used to the great advantage and apparent enjoyment of all the patients. With these improvements, it would be hard to conceive of any institution more admirably suited to the open-air treatment of tuberculosis than the Sanatorium,—an opinion which has been voiced by every one who has studied the subject and seen the recent improvements.

During the past year an estimate has been made of the lasting results of treatment in cases which have been discharged as "arrested" during the fifteen years preceding 1906. Of 160 "arrested" cases, over 83 per cent. are alive and well and at work in various ways. The majority of those who relapsed were either advanced cases in whom an arrest of disease was not expected or else those who returned to unhygienic sur-

SANITARIUM

roundings or who left the Sanatorium, against advice, too soon. Many who were discharged as "improved" only have since regained their health by following out the precepts taught them at Sharon, and are useful and happy members of society again. Those who unfortunately failed to regain their health, at least have been taught how to care for themselves and others, and have become missionaries for teaching the value of fresh air and good food and the necessary precautions for the prevention of disease in others.

In giving such results as these and contrasting them with those of fifteen or twenty years ago, when all cases of consumption were regarded as practically hopeless unless sent to distant climates, the Directors feel that they have every reason to continue to ask for generous aid in supporting the Sanatorium which has taken for years such a prominent position in the anti-tuberculosis crusade.

Much satisfaction is felt from the management of the woodland which was put into the charge of Professor Richard T. Fisher, of Harvard College, two years ago. Not only have his services thus far brought some addition to the funds of the Sanatorium from sale of timber, with prospect of greater profit in the future, but the development of the woods by judicious cutting, and the making of paths to guard against fires, has added to the available park lands to be used for the benefit of the patients. A double purpose is thus served. Not only is the special care of the woodland made beneficial to the Sanatorium, but it is an object-lesson in the science of forestry sorely needed in our community.

The Directors desire to express again their thanks to the ladies and gentlemen of the Auxiliary Committee,

who, in holding a small bazaar at Copley Hall last March, gave substantial aid to the treasury. They also wish to thank the newspaper press of Boston and Sharon for their ever-ready assistance and Messrs. F. W. Bird & Son, of East Walpole, and Messrs. Pettee & Colburn, of Sharon, for generous help.

In closing they ask for public support in the following ways:—

1. Subscriptions of any amount to assist in defraying the annual expenses and to keep the Sanatorium out of debt.

2. A larger list of Annual Subscribers.

3. Large subscriptions to the Endowment Fund, now amounting to about \$20,000.

4. Further subscriptions to the "Lovering Fund," to bring it up to \$8,000, the income from which shall be used to assist worthy women to pay the price of board.

5. A fund for the establishment of a scientific laboratory, which would greatly enhance the value of the work done at the Sanatorium in the crusade against tuberculosis.

THE DIRECTORS.

## SUPERINTENDENT'S REPORT.

---

DECEMBER 1, 1907.

TO THE DIRECTORS OF THE SHARON SANATORIUM:

*Ladies and Gentlemen,*—In offering my report for the nine months preceding December 1, I am obliged to state that the cost of provisions has never been so high before as during this time, and that in consequence the cost per patient has been higher than ever before. To accomplish the desired results, however, it has been impossible to curtail the supply of necessary articles of food, and hence we have to meet an increase of expense.

The garden yielded fairly well during the summer, considering the damp weather. We had a fine crop of potatoes, enough probably to carry us through the year and to supply seed for next spring.

The ice-house built last year has proved very satisfactory.

The new refrigerator closet near the kitchen has been of the greatest help to that department, and the new sleeping balconies have been greatly enjoyed by the patients.

We have not much to report about the "Lovering Fund." No special effort to increase the fund has been possible this year, but the sum of fifty dollars has been given in small donations. Several times this year we

should have been glad if the fund had been complete, so that we could have helped some worthy women who needed assistance.

Respectfully,

ALICE R. HODGES,  
*Superintendent and Matron.*

THE PARLORS.

THE DINING-ROOM.

## MEDICAL REPORT.

---

Full capacity of the Sanatorium . . . . .	23
Number of patients entered since March 1, 1907 . .	35
Number of patients discharged during the year . .	34

Of those discharged, two classed as suspected phthisis lacked sufficient clinical evidence to make a definite diagnosis, even though they showed suspicious symptoms of beginning pulmonary trouble. These two cases, together with two who stayed less than a month, are, therefore, not considered in detail in this report.

The following table shows the condition of the remaining thirty patients at entrance and the result of treatment. It should be remembered that in this table the classification is that used in former years in these reports. This is done for the sake of comparison with previous years. The tabulation recommended by the National Association will be given at the end of the Medical Report. By the former method the term "arrested" is applied to all cases, with very rare exceptions, in which cough and fever have disappeared, when the sputa, if present, show an absence of bacilli, the general symptoms and appearance being those of health when they leave the Sanatorium. The term "cured" is not used until many months after the disappearance of all active symptoms and when the patient has returned to ordinary conditions of life. Many of those discharged as "arrested,"

however, would, from their general condition, be classed with justice under the more favorable term.

	Incipient.	Advanced.	Totals.	Percentage.
Arrested . . . .	17	2	19	63.3
Improved . . . .	2	6	8	26.6
Not improved . .	—	3	3	10
Total . . . .	19	11	30	

Among the “arrested” cases (19):—

The number who had tubercle bacilli in their sputa was . . .	6
The number who had a positive tuberculin reaction was . . .	13
	<hr/> 19

Average stay of all cases . . . . .	4.7 months
Longest stay of “arrested” cases . . . . .	15 months
Shortest stay of “arrested” cases . . . . .	1 month
Average stay of “arrested” cases . . . . .	4.8 months
Average gain in weight of all cases . . . . .	11.6 pounds
Average gain in weight of “arrested” cases . . . . .	14.4 pounds
Average gain in weight of “improved” cases . . . . .	8 pounds
Average age of “arrested” cases . . . . .	28 years
Average age of all cases . . . . .	30 years

In stating the shortest stay of an “arrested” case as one month, it should be remembered that no claim is made other than that all active symptoms had ceased almost immediately after entrance.

Of the twenty-three cases still in the Sanatorium the disease is in a state of arrest in seven, and nine are improved: five have been in the institution too short a time to warrant any conclusions being drawn regard-

ing their condition. Tubercle bacilli have been found in fifteen. Three have had a positive tuberculin reaction, while in five the physical examination alone and the history warrants making a diagnosis of tuberculosis, although the tuberculin test will be used later for corroboration.

Favorable reports are still received from the majority of the patients who were formerly in the Sanatorium and discharged as "arrested cases." Some of these patients left Sharon nearly sixteen years ago, and have been well ever since, leading active lives.

We are indebted to Dr. Walter C. Bailey for occasional assistance during the year and to the Saranac laboratory for generously supplying us with tuberculin, which is used both for diagnostic and therapeutic purposes in many cases now.

We add our earnest appeal to that of the Directors for financial aid in supporting and increasing the work of the Sanatorium. A suitable X-ray apparatus is greatly desired.

VINCENT Y. BOWDITCH, M.D.

*Medical Director.*

WALTER A. GRIFFIN, M.D.

*Resident Physician.*

No record has been made of the direction or velocity of the wind, but in general all west winds are fair and east winds bring foul weather. Sudden changes are frequent, but the harshness of the east wind is not felt so keenly as in Boston because of the intervention of the Blue Hill of Milton. The Sanatorium is so well protected by woods that there is seldom any hardship to patients from winter winds.
